

The Roadmap -Key Points -

Why CSI?

Brings independent knowledge and expertise, providing new insights to decision-makers

(Greer et al, 2017)

Enhances legitimacy, quality, understanding and long-term applicability of policy initiatives

(Pompidou Group, 2016)

Is an obligation in a democratic society

(Pompidou Group, 2016)

The roadmap is....

...a resource to help states and civil society organisations think about civil society involvement in drug policy.

Two key questions:

- **How can we assess CSI?**
- **How can we improve CSI?**
 - **Actions by states**
 - **Actions by CSOs**

Assessing CSI

... allows shortcomings to be identified, actions to be formulated based on evidence, results to be measurable and objective.

The roadmap contains guidance on:

- Conducting desk and field research
- Designing, piloting and conducting surveys
- Analysing and writing up results

Improving CSI

States can....

- *Support CSI through:*
 - *Policy process design*
 - *Financial and other support*

CSOs can....

- *Support CSI through:*
 - *Capacity building*
 - *Evaluating and monitoring*
 - *Advocacy*

Let's talk!
